

7 Benefits of Installing a Door with Push Plate in High-Traffic Areas.

In every business or public space, the control and management of movement patterns are vital. Specifically designed for high-traffic zones, such as the lobby, retail space, and public edifices, more complex furniture is designed to be both durable and easy to operate, which is ideal for heavy usage. The application of doors with push plates is one such effective option. At Judge Hardware, we focus on providing and developing door hardware of high quality to increase its practical application and durability. Now, let us detail the seven advantages of having doors with push plates installed in busy areas.

Increased Shelf Life

Doors in busy areas often get worn out because of constant use. A great example is door systems with push and pull plates, designed to handle hundreds of uses each day. Each time someone pushes or pulls the door, the push plate helps protect it by absorbing some of the impact. That's why, at Judge Hardware, our [push and pull plates](#) are made from strong materials like steel or aluminum. These heavy-duty plates help the doors withstand frequent use and keep them in good condition, even with lots of daily wear and tear.

Restoration of Functionality

In high-traffic areas, the design must ensure that doors are easily operable and usable. Push plates are a great way to simply open a door when both hands are busy or when it is more efficient to push rather than to grasp onto a handle which tends to be more difficult in crowds. Thanks to this hands-free operation, it enhances the smooth flow of traffic so that people can both go in and out smoothly. You help provide a more reasonably accessible environment for everyone by putting up doors with push plates.

Hygienic Solution

Cleanliness is a critical concern in managing such facilities if one is to look at traffic conditions around a hospital, restaurant, or school. Push plates help in limiting the transmission of microbes because the users do not have to touch the handles to push open doors. This is even more relevant in places where hygiene is of utmost importance. Here at Judge Hardware, we have touchless push plates that reduce dirt, hence making the environment healthier.

Stylish Aesthetics

Although functioning well is important, ensuring that the space is aesthetically appealing is also a factor that has to be considered. Push plates come in different styles and shapes as well as finishes which means there are options that will be suitable for your interior design. Whether you want something modern and minimal or traditionally styled, Judge Hardware has the perfect push plate for you to complete the aesthetics of your space.

Cost-Effective Maintenance

By investing in sturdy doors with push plates, one is assured that savings would overshadow most costs. This is because those types of doors are meant to endure real use and are thus less in the place of needing replacement and repair. Judge Hardware offers quality products that warrant your return on investment.

Improvement of Safety Features

Safety is vital in places where there is a lot of movement. Emergencies may arise where push plates may be unable to operate as intended and in such cases, users may simply push the door instead of seeking handles which do consume time. Also, push plates combined with automatic doors enable people with durable restrictions access to closed doors with ease therefore creating an accommodating environment. From their

inventory, Judge Hardware has several more options for safety-related access control while making the spaces secure.

Broad Functionality

Commercially, [push plate for door](#) are push plates for use. No matter the situation be it a busy office, a commercial, a hospital, or a school, the doors can be altered to fulfil specific requirements. Because of their versatility in design and functionality, push plates can be used in a wide range of situations. At Judge Hardware, when you come to us, we provide assistance in knowing the best hints for your case insight towards accomplishing the aesthetic and functional aspects.

It allows for many door and hardware alternatives which you will find when you require them to suit your requirements. Whenever it is invigorating upon existing doors or building a new space, we are available to support you in every phase.

FAQs

What benefits can you obtain from doors equipped with push plates which are quite efficient for use in extremely busy regions?

The integration of push plates into the existing doors allows them to be self-sustaining and self-operating in terms of user interaction which in turn entertains the possibility of hands-free contact which comes with added convenience. Apart from being easy to install and cost-effective to maintain, they have good styling appeal, enhanced safety attributes as well as application versatility.

Can we consider that push plates differ in their finishes, and that some are manufactured using other materials, for example, plastic or acrylic?

Indubitably so! [Judge Hardware](#) provides you with various options as in-class steel, aluminium and brass-made pushpads that are available in many different finishes. You can match these with your interior decor. Thus you

will not waste your time trying to hunt down push plates for your windows and doors that will look appropriate in the room.

**What factors need to be considered when selecting a push plate for a door which will suit you the best?
What size plate is appropriate for the door knob /handle?**

The most common deciding factor as far as the push plate is concerned, is the size of the door, followed by the volume of foot traffic to the particular door. With the expert opinion from Judge Hardware, you can choose which style & size will be most appropriate in terms of its functionality as well as looks.

Is it possible to add push plates to the existing doors or should I get new doors?

In most cases, push plates can be added to existing doors if they are suitable for that purpose. Our experts at Judge Hardware can also assess your current door designs and suggest the most effective ways of fitting push plates in place without replacing the whole door.
